

We have worked on a little project for you, here we are gonna tell you about icelandic nature and Snæfellsnes. We have some maps and we are mostly gonna talk about volcanoes and earthquakes.

My cousin and I were exploring the volcano eruption in Geldingadalir 2021. And I saw the lava going in all directions. The walk was hard. I walked a long way. The smell was so good that I got closer to the volcano and closer and closer so I fell into volcano and look at me I am „sprell” alive. Just kidding because my teacher will not accept the truth.

It was very fun. I got to drink kókómjólk (chocolate milk) and eat gifflar (cinnamon buns) and oreo. The smell was not that good but it's okay. Jón Svavar 7. bekk.

Rauðakúla

Here we have Rauðakúla it is an crater and there is an old lava flow down below it and its called Bláfeldarhraun

Bláfeldarhraun

STADARSVEIT

Here we have our school Lýshólskóli, we have a tiny playground and a football field.

Anita yes she felt an earthquake at her mom home in 2023.

Here are our answers to your questions.

Is Snaefell an active volcano?:

It's actually Snæfellsjökull not Snæfell cause that is another mountain here in Iceland, but Snæfellsjökull is an active volcano. Snæ means snow, fell means a mountain, jökull means a glacier so the name is really “Snow-mountain-glacier”.

Snæfellsjökull the volcano erupted last, 2000 years ago.

This pictures is from the volcano in Vestmannaeyjar in 1974.

Suðurlandsvegur eftir skjálfta í júní árið 2000.

MYND/STÓÐ 2.

And this picture is after the big earthquake the year 2000.

What type of volcanoes do you have in iceland?:

We have different types of volcanoes here in Iceland like, rows of craters, piles, fiery and caldera.

Name of this volcanoes is Búðarklettur and Saxhóll

How destructive are volcanoes Iceland?:

Very bad sometimes at some places. This pictures is from the volcano in Vestmannaeyjar 1974.

The people who lived in Vestmanneyjar needed to evacuate their home

Has Iceland ever had really bad floods as a result of volcanoes:

Here in Iceland we have had some big floods like the glacier flood it was one of the biggest flood here in iceland, the glacier is called Skeiðarárjökull it's right next to Vatnajökull and Vatnajökull is the biggest glacier.
